

Cleobury Mortimer Central(about 1 mile radius)

The footpath to the north of the town which runs east/west to the north of the caravan park has been modified to its correct location south of the brook. However it is obstructed in the caravan park as there is no bridge. One is due to be put in late 2021 or 2022. SO670764

The paths through the pioneer centre have been diverted and one has been closed. They are not as shown on older OS maps. SO687778. *The Dinmore Dally* uses part of the diverted path.

The footpath going south east from Wyre Farm towards the golf course is on a different line to that shown on the map. Follow the waymarks. SO688771

The path going south from the golf course towards the A4117 is on a different line to that on the map. Go to the south end of the clubhouse and follow the waymarks. SO691766. *A Round of Golf*.

South of Cleobury to Neen Sollars and Milson

The path in the centre of Milson going to Hillhouse farm has not been useable for many years.. SO637730

The path in Neen Sollars between the Cleobury road & the road to Mamble is not useable. SO663724

There is no footbridge on the path from Lower Langley to Lea Fields although the stream is fordable in dry periods. SO649733. Note that there is a footbridge a little further west near Upper Langley.

The footbridge across Mill Brook on the path from Coreley across the airfield has collapsed. SO631740. Shropshire Council are due to replace it in 2021.

The path south of Wood Farm in Milson, through the orchard and then to the west of the Knapp is problematic. The landowner has removed all waymarks through the orchard but the path is walkable. The path through fields is regularly blocked with crop and the path through the Knapp does not exist. We recommend using the parallel path slightly to the east.

Close by, the path going west from Bassards bank is blocked by crop by the same landowner, but is useable.

The aquaduct over the Rea to the south of Neen Sollars (west of Marlbrook) has collapsed. It is not possible to get across the river at this point. SO652703

There is no footbridge over The River Rea between Marlbrook and Sturt. SO656707

The definitive line going south from NeenSollars to Marlbrook is blocked through the grounds of the Dower House. An alternative working line is waymarked.

West of Cleobury to Hopton Wafers

The path running SW/NE between the minor road at Bransley and the A4117 does not exist on the ground. We have not done anything about this as a much better route is to continue on the lane to the A4117 and straight across. SO656754. Going west from Bransley is fine and is on *The Court Circular*

The triangle of footpaths between Lower and Upper Down farms do not exist on the ground. The white road/track between the two can be used. SO630746

The footpath which runs from Upper Dudnill to Ditton Mill has been diverted and is not as shown on older OS maps. SO643747. This is on *Earls Ditton Exploration* and *The Court Circular*.

The footpath which runs from Haybridge north west towards Upper Down has been diverted to the field edge and is not as shown on older OS maps. SO640740. This is on *The Milson Meander*

The footpath west from Little Stepple is diverted and not as shown on older OS maps. It goes around the farmyard and then follows the hedge line south west to meet another footpath. SO655771

The footpath which runs from Common Lane to Sproseley has been diverted(2017) and is not as shown on OS maps. The new route can be seen on our Walk leaflet *A walk in three parishes*.

We do not recommend using the path from Dippers Bank caravan park to the fruit farm then on to Withypool farm. This path is not regularly maintained so gets heavily overgrown. There is also no exit onto the A4117 (the path does a dog leg). SO638757

North of Cleobury

The footpath at Lower Elcott is a dead end as the white road to the public road is private. SO679784

The path to Stepple Hall is a dead end as the track at the west end is private. SO660781

The path heading west off Baveney Lane has been illegally fenced in and so is overgrown with bramble and hedge growth. On the map this is under the wording Yew Tree Farm SO698797

The footpath from the B4363 at Wall Town going north west to Lower Baveney is difficult at the footbridge. The official bridge is beyond use. The nearby private bridge is useable but may involve climbing over a fence. The landowner also may challenge its use.

*The landowning family at Cleobury Lodge & Lower Baveney Farms persistently block field paths with crop. Requests to Shropshire Council to sort this have not been successful. The worst paths affected are at "The Nash", east of Birchen park in Kinlet & some paths at Baveney Wood.

The footpaths at "Dinmore" have been diverted(2018) and are not as shown on OS maps. The new routes are well waymarked. These routes are on *The Neen Savage Safari*. SO691776

The footpath through the middle of Overwood Farm has been diverted away from the farmyard(2018). SO683797. Shropshire Council have not yet(July 2021) got around to putting new furniture & signage on it.

Footpaths across Overwood common*(see above) have been significantly diverted(2018) and are not as shown on OS maps. The new routes are waymarked. These are on *The Neen Savage Safari*. SO683792

East of Cleobury to the County Boundary at Far Forest

The path at Furnace Mill along Baveney Brook going East into the Wyre Forest is so badly eroded that it is dangerous to use and has been closed. SO722766

The path from Betts Nature Reserve to Furnace Mill house is problematic in that there is no way into the grounds of Furnace Mill House. It needs diverting but the council are not doing anything about it. Please report this to the council if you come across it to give this problem higher priority SO720765

The footpaths north and East of our Golf Club have been extensively diverted and bear little relationship to what is shown on (older) OS maps. An information board at the Golf Course gives more information. These routes are on *The Three Coppices* and *The Neen Savage Safari*.

At Lem Hill on the A4117, the path which goes south from the road towards Acre Farm. The exit from the road is not where it seems. It is further west along the road about 100m at the field boundary under the 'm' of Oak Farm. SO717752
